All Rights Reserved

Tips for Solving the Word Search

Scanning the letters is the main technique for solving word searches. Some **scanning strategies** include:

- Scan row by row from left-to-right and right-to-left.
- Scan column by column from top-to-bottom and from bottom-to-top.
- Seeking out uncommon letters such as Q, X, J or Z.
- Focus on letters that jump out to you. Some people find that round letters such as O jump out to them. Other people find straight letters such as H jump out at them.
- Scan for letter pairs such as EE or OO.

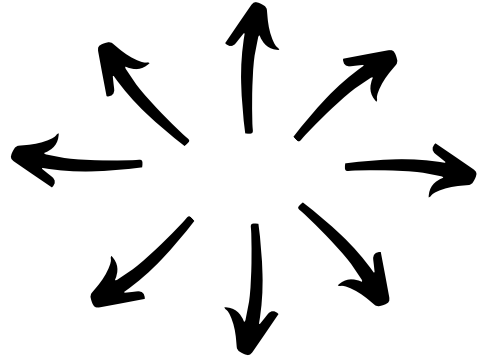

Once you have **located an interesting letter**, check the letters around it to see if it should be investigated further.

Using your finger to follow the letters (or the end of a pen/pencil) as you scan will help keep your focus and stop you from losing your place.

When you **find a word**, cross it off the word list to track your progress.

Instructions

Search up, down,
forward, backward
and on the diagonal
to find the hidden words

We hope you enjoy this puzzle book.
